| DRA website and training | 3.77 |
| Facilitated professional development (IEPs linked to EEs) | 3.42 |
| Stakeholder meeting review of participation guidelines | 3.39 |

Selected comments:

We all have unique learning styles. I wish the training would not demand attention from independent learners. Some of us do great continuing to move through the materials.

Much better than last year. A little overwhelming but well presented. Voice on module 2 was horrible.

Know you are probably in a crunch too but would have been nice to have had less info all at once (it will get done anyway :)

I feel like I have been provided what I need to train my folks, now it's a matter of feeling confident and making sure they understand.

It will take extensive work to take all this info (plus all that was glossed over) and turn it into a training for our staff. Day 1 modules needed to be presented in a different order so that content made sense. In **3** days of training, we did not see a sample test, or the EE documents. VERY disappointing. We needed this practical content.
