Provider Description:

A+ In Home Tutoring provides highly individualized tutorial services to all students grades K-12 in reading and mathematics. Services are designed to meet the educational needs of all students including students with disabilities and English Language Learners. This method of individualizing instruction is highly effective in raising student achievement levels. For this reason A+ In Home Tutoring provides services one-on-one, in-home as a primary teaching method. By offering this type of program, parents have the flexibility to choose the most convenient program for their family but at the same time assure that their student receives the benefits of individualized instruction. This model of instruction ensures that students respond best to tutorial session topics and content as they directly align to that student's specific needs and prevent frustration or embarrassment that the student may face in the classroom or larger group setting. Services in the A+ In Home Tutoring program take place primarily in the student's home preventing the need for transportation on behalf of the parent. While the parent/authorized adult must be present for the entire tutorial session, offering the convenience of in-home tutoring and the opportunity to set their own schedule directly with tutor prevents unnecessary cancellations and allows sessions to be conducted consistently for the student. Parents also have the option of having sessions take place at a local public location such as a library or community center as determined on per case basis with prior authorization from the school district. A+ In Home Tutoring sessions take place 1-2 times per week with session length ranging from 1-2 hours as determined by parent/guardian preference. By allowing parents to choose the most convenient program for the family and at the same time ensure the student receives individualized instruction directed toward their needs the A+ In Home Tutoring program is designed for the student to maximize achievement results. The A+ In Home Tutoring program has proven to be effective especially with underachieving students with average increases in mastery around 20% from start to finish of the program.

Program Description:

- Number of years in business providing supplemental services: 1

- Providing service in content areas: *(Check all that apply)*
 Reading (and Writing) Mathematics Science

- Grade levels in which services will be available: K-12
