DISTRICT SERVICE CHART

Each provider will indicate districts to be served with a “Y” in the first column to the right of the district name. It is not necessary to input information for districts that will not be served. Based on PPA and projected costs for each district, indicate minimum and maximum number of students per each site served in the district, and the number of hours that can be offered to each student in that district. It is not required that the minimum/maximum number of students or the number of hours offered to each student be the same for each district. However, a provider agreeing to offer service in a particular district must be available to serve all eligible schools within that district.
